NIKE 2006 autumn new product introduction

AIR MAX series

[/!]/[B]/[size]

, "bringing innovation and inspiration to every athlete in the world," is the Manifesto of Nike. At the beginning of 2006, Air , Max , and 360 technologies were introduced, which led NIKE's innovation to a new era, and the 360 degree full air cushion technology pushed NIKE's air cushion technology to the top. The autumn of 2006, NIKE attack again, this technology will be widely used in the development of basketball shoes and running shoes are injected Air 360 Max the essence of technology, to provide for the athletes to enjoy more innovation and inspiration.

1. when the history and future meet Air Max 180

25 years ago, NIKE rewrote history with cushioned shoes. Runners wear it immediately, and there's a different feeling. However, the key technology is hidden in the bottom of foam shoes, which consumers can not see. By chance, a designer of NIKE found in the examination of the sample, in the foam sole interlayer is removed from the mold when left some holes, there is a part of the air cushion unit. The discovery has changed the face of the industry.

NIKE's Air sneakers, released in 1987, mark the beginning of visible technology in Max. Since then, each generation of Air , Max sports shoes, has improved on the previous basis, providing more robust cushioning, and demonstrating an increasing capacity for innovation. In the end, the revolution came to an end through the introduction of Air , Max , and 360, the first pair of running shoes without a midsole. Also based on this new Max the Air unit; NIKE's shoe designer Andrew Caine inspired to create a revolutionary Air Max 180 running shoes.

speaking of running shoes, the most important thing is that the soles should have good cushioning to minimize the damage caused by the impact. For the Nike , Air , and Max running shoes, the sole is made of air. Andrew tried to apply revolutionary techniques in Air , Max , and 360 running shoes to Air Max 180. By working closely with shoe designer Hans and Guenther, Andrew studied the full palm air cushion carefully and judged where it should be divided into two halves, giving the Air M>
